SUMMARY

Detail-oriented and passionate Frontend Developer with a strong foundation in building responsive, user-friendly web applications. Proficient in modern JavaScript ecosystems, specialized in React.js for crafting dynamic interfaces, and highly skilled in Tailwind CSS for clean, utility-first styling. Experienced in bridging frontend logic with robust backend frameworks like Laravel to deliver seamless full-stack integration. A fast learner eager to contribute to innovative projects and collaborate within agile development teams.

EXPERIENCE

Network & Infrastructure Technician (Internship)

Nov 2023 - Apr 2024

PT BLIP INTEGRATOR PROVIDER

- Installed, configured, and maintained wireless network devices (Wi-Fi/Access Points) in compliance with industry operational standards.
- Conducted regular network troubleshooting to identify, isolate, and resolve connectivity issues.
- Collaborated with the technical team on site surveys to map out and plan new device deployments.
 - Successfully configured and deployed 5+ new Access Points across key corporate operational areas.
 - Improved network issue resolution time by 20% through systematic fault diagnosis methods.

Mikrotik, Fusion Splicer, OPM (Optical Power Meter)

Field Technician / Jr. Network Engineer (Project-Based)

Jul 2024 - Aug 2024

- Executed on-site wireless network implementation projects, handling tasks from cable routing to hardware mounting.
- Configured basic routing, SSID parameters, and bandwidth management on deployed access devices.
- Performed post-installation signal strength testing and network quality assurance.
 - Successfully delivered on-site Wi-Fi deployment with a 100% device functionality and uptime rate upon project completion.
 - Completed the target area network setup 3 days ahead of the deadline set by the project supervisor.

Access Point

EDUCATION

Informatics

Institut bisnis dan teknologi indonesia | Bachelor's Degree • In Progress
Web Development, Database Management, UI/UX Design

Aug 2024

Computer and Network Engineering

SMK Teknologi Nasional Denpasar

2021

Focused on computer hardware troubleshooting, network infrastructure management, and wireless network installation. Covered relevant coursework including Network Systems, Operating Systems installation, Network Security, and basic Programming.

ORGANIZATIONAL EXPERIENCE

PKKMB 2025 Committee

Sep 2025 - Sep 2025

Committee Member Logistics

Campus Freshman Orientation Event

- Managed and distributed logistical equipment for a campus orientation event accommodating over 500+ new students.
- Streamlined the distribution of participant kits, reducing wait times by 20% during the registration process.
- Resolved on-site logistical issues rapidly, ensuring zero technical disruptions during peak event hours.

Campus Student Activity Unit Cyber Hub

Oct 2025 - Current

Secretary

Student Organization Administration

- Drafted, reviewed, and finalized all official incoming and outgoing correspondence for the organization.
- Managed the systematic numbering, recording, and digital archiving of all official organizational letters.
- Distributed invitations and official notifications to internal members and external campus partners.
- Improved letter generation efficiency by creating standardized templates for recurring organizational needs.

SKILLS

JavaScript, React, Git, Docker, Tailwind CSS, Laravel

LANGUAGES

Bahasa Indonesia (Native) English (A2)

PROJECTS

Student-Notes-Ai 2026

TypeScript, React, Tailwind CSS, Laravel, Google Gemini API, MariaDB, Docker

Student Notes AI is an AI-powered study platform that lets users upload PDF course materials and automatically generates structured study notes, TL;DR summaries, multiple-choice quizzes, and flashcards using the Gemini API. Built full-stack with React (TypeScript), Laravel, MariaDB, and Docker.

- Reduced study summary and quiz creation time from hours of manual work to under 1 minute per document
- Quiz question count and summary points scale dynamically (5–15 questions, 3–7 points) based on content length, ensuring proportional coverage for both short notes and long documents (tested with 400+ page textbooks).
- Database-level caching of AI-generated results reduces redundant API calls for the same material, optimizing usage within the Gemini API Free Tier
